DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed October 20, 2006 are acknowledged.
2. The rejection of claims 1-21 under 35 U.S.C. 102(e) as being anticipated by LeMercier et al., U.S. Patent Number 6,773,629 is withdrawn due to applicant's argument.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned

Art Unit: 1774

with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-21 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 10 and 15 of U.S. Patent No. 7,018,565. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the present claims and the patented claims recite a light emitting device comprising a LED light source that produces a light output and a wavelength transformer comprising an alkaline earth thiogallate with europium as the activator. The present claims recite that the alkaline earth thiogallate is $\text{Sr}_{1-x}\text{Ca}_x\text{Ga}_2\text{S}_4:y\text{Eu}:z\text{Ga}_2\text{S}_3$ wherein x is 0.0001 to 1 and z is 0.0001 to 0.2. The patented claims recite an alkaline earth thiogallate with the formula $\text{SrGa}_2\text{S}_4:\text{Eu}:x\text{Ga}_2\text{S}_3$ wherein x is 0.0001 to 0.2. Although the thiogallate of the patented application does not recited calcium in the structure, the present claims recite a very minimal amount of calcium in the structure when x is 0.0001. Therefore, it would have been obvious to one of ordinary skill in the art to recognize that the thiogallate structure of the patented claims is equivalent to the thiogallate structure of the present claims in that the present claims have a negligible amount of calcium present.

5. Claims 1-21 would be allowable upon submission of the terminal disclaimer.

Response to Arguments

6. Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.
